

Amendment Dated May 18, 2005
Response to Office Action Dated 2/18/05

Application No. 10/806,983
Attorney Docket No. 005222.00210

IN THE CLAIMS:

Claims 1 – 24 are cancelled.

25. (Previously Presented) A computer program embodied on a computer readable medium for providing a computer implemented training session for identifying a user's assumptions in light of a reaction to a stimulus, the computer program comprising:

- (a) a code segment for presenting a first portion of a stimulus to a user;
 - (b) a code segment for prompting the user to enter a reaction to the first portion of the stimulus;
 - (c) a code segment for receiving the user's reaction to the first portion of the stimulus;
 - (d) a code segment for recording the user's reaction to the first portion of the stimulus;
 - (e) a code segment for prompting the user to enter an assumption that forms a basis of the user's reaction;
 - (f) a code segment for presenting a second portion of the stimulus to the user;
- and
- (g) a code segment for providing feedback to the user adapted to identify how the user's reaction was based on the assumption.

26. (Original) A computer program for providing a computer implemented training session as recited in claim 25, and further comprising a code segment for prompting the user to enter an assumption that forms a basis of the user's reaction to the stimulus, and a code segment for providing feedback based on the assumption.

27. (Original) A computer program for providing a computer implemented training session as recited in claim 25, wherein the user's reaction to the stimulus includes at least one of a text entry and a choice of presented options.

28. (Original) A computer program for providing a computer implemented training session as recited in claim 25, wherein the feedback is provided by an interactive coach.

Amendment Dated May 18, 2005
Response to Office Action Dated 2/18/05

Application No. 10/806,983
Attorney Docket No. 005222.00210

29. (Original) A computer program for providing a computer implemented training session as recited in claim 25, wherein the stimulus includes at least one of a prerecorded audio clip, a prerecorded video clip, an animation, a graphic, a text presentation, a real-time audio stream, and a real-time video stream.

30. (Original) A computer program for providing a computer implemented training session as recited in claim 25, further comprising a code segment for providing the user access to a knowledge base.

31. (Original) A computer program for providing a computer implemented training session as recited in claim 25, further comprising a code segment for deploying the training session on a computer network using at least one of local area network protocol, wide area network protocol, Internet protocol.

32. (Previously Presented) A computer system for providing a computer implemented training session for identifying a user's assumptions in light of a reaction to a stimulus, the training session comprising:

- (a) a processor;
- (b) a memory that stores programming information under control of the processor;
- (c) logic for presenting a first portion of a stimulus to a user;
- (d) logic for prompting the user to enter a reaction to the first portion of the stimulus;
- (e) logic for receiving the user's reaction to the first portion of the stimulus;
- (f) logic for recording the user's reaction to the first portion of the stimulus;
- (g) logic for prompting the user to enter an assumption that forms a basis of the user's reaction;
- (h) logic for presenting a second portion of the stimulus to the user; and
- (i) logic for providing feedback to the user adapted to identify how the user's reaction was based on an assumption.

Amendment Dated May 18, 2005
Response to Office Action Dated 2/18/05

Application No. 10/806,983
Attorney Docket No. 005222.00210

33. (Original) A system for providing a computer implemented training session as recited in claim 32, and further comprising logic for prompting the user to enter an assumption that forms a basis of the user's reaction to the stimulus, and logic for providing feedback based on the assumption.

34. (Original) A system for providing a computer implemented training session as recited in claim 32, wherein the user's reaction to the stimulus includes at least one of a text entry and a choice of presented options.

35. (Original) A system for providing a computer implemented training session as recited in claim 32, wherein the feedback is provided by an interactive coach.

36. (Original) A system for providing a computer implemented training session as recited in claim 32, wherein the stimulus includes at least one of a prerecorded audio clip, a prerecorded video clip, an animation, a graphic, a text presentation, a real-time audio stream, and a real-time video stream.

37. (Original) A system for providing a computer implemented training session as recited in claim 32, further comprising logic for providing the user access to a knowledge base.

38-55. Cancelled.
